

J 112 SUB

The J 112 SUB from Jamo offers high-performance with stylish aesthetics by utilizing modern materials and core technologies. Intended to be used with high-performance loudspeaker systems, the J 112 SUB completes your home theater and music listening experiences. With an impressive amplifier capable of 600W of peak power, this subwoofer can deliver higher sound-pressure levels at lower distortion, resulting in maximum musical fidelity and reproduction of details.

The J 112 SUB features a 12" long throw Injection Molded Graphite woofer with Hard Conical Cone technology for exceptionally low frequency response with minimal distortion. The all-digital amplifier delivers clean high efficient power and accuracy in reproduction. Housed in a MDF cabinet with a sleek high gloss polymer veneer finish, this versatile subwoofer seamlessly integrated into any décor.
