

JAMO 360 SERIES • S 35 HCS

S 35 Specifications

System	2-Way
Recommended Amp Power	Up to 125W per channel
Impedance	8 Ohm nominal
Sensitivity (dB @ 2.8V/1m)	83dB
Frequency Response	100Hz - 25kHz
Crossover	1.8KHz
Tweeter [mm / in]	25 / 1
Dimensions [in]	6.75" x 5" x 5"
Enclosure Material	ABS Plastic
Finishes	Black or White

C 35 Specifications

System	2-Way
Recommended Amp Power	Up to 125W per channel
Impedance	8 Ohm nominal
Sensitivity (dB @ 2.8V/1m)	86dB
Frequency Response	80Hz - 25kHz
Crossover	2.4KHz
Tweeter [mm / in]	25 / 1
Dimensions [in]	6" x 12.5" x 7"
Enclosure Material	ABS Plastic
Finishes	Black or White

Design

Drawing inspiration from nature, the Jamo 360 boasts organic curvaceous shapes that produce immersive and vivid sound in all directions, creating both a visual and acoustic statement in your home or commercial space.

In the 360 S 35 HCS configuration, high-gloss spherical shells encompass the tweeters and woofers of four S 35 speakers in a welcoming open design, creating the ideal structure for luscious 360 degree sound. The aluminum-polypropylene woofers of the S 35 speakers are neatly surrounded by a high-quality metallic trim, developing an eye-catching visual contrast.

The matching C 35 center channel speaker sports an elegantly sloped design with a beautiful high-gloss shell that houses a pair of aluminum-polypropylene woofers and aluminum dome tweeter which create stunning vocal clarity, ensuring you never miss a whisper.

A polished aluminum post connects the S 35 and C 35's shells to a brushed aluminum alloy base that keeps these specimens of Danish design firmly rooted to a flat surface. Thoughtfully crafted, the satellite and center channel speakers can be easily mounted on a wall, granting you the ultimate in flexibility and producing a wide and lifelike soundstage.

The Jamo 360 Series' distinctive Danish design makes these speakers a show-stopping conversation piece at your next dinner party and represents a true statement on modern acoustic and visual taste.

Technology

By utilizing Jamo's exclusive Omnipolar® acoustic dispersion technology, the 360 Series provides a unique and immersive listening experience. This is based on the principle that sound should be omnidirectional rather than directional with a narrowed focus, providing consistent frequency and time response throughout the room, so every spot is the "sweet spot."

The 360 S 35 HCS boasts a bevy of high-quality performance features including:

- S 35's Omnipolar® technology which allows for totally immersive sound everywhere in the room
- C 35's direct radiating technology for more focused, directional dialogue in larger room settings
- Aluminum dome neodymium tweeters
- Aluminum-polypropylene hybrid dome woofers

Despite their diminutive size, the Jamo 360 Series is perfect for larger rooms. Pairing the S 35 satellites together creates a wide front soundstage and an alluring immersive surround effect. Adding the monopole, dual-woofer C 35 center channel produces clear vocals even at farther listening positions.

You won't believe it until you hear it.
The 360 Series is Global Sonic Immersion.
