## SANTORIN 21

COMPACT YET POWERFUL SUBWOOFER

Santorin 21 subwoofer is highly efficient whether it is used in pure audio or as a complement to a Home Theater installation. The vertical 360° down-firing driver offers punchy bass, full of details and depth. It allows the placement of the subwoofer near walls and furniture with no acoustical compromise. In Glossy black or glossy white it is ideally fitting with satellite speakers such as IO2 or Eole 3.

# SANTORIN 21

## POWERFUL EFFICIENT WOOFER

The paper based membrane of the 21MT3 woofer enables clean reproduction at low and very high sound levels. Light but well damped, it provides quick and generous bass. Thanks to the high efficiency of the woofer and the 400 W peak power of the TSA 200 D amplifier, Santorin 21 provides thrilling dynamic effects, full of realism on both music and home theater tracks..

## 360° SOUND EMISSION

The traditional, horizontal emission of subwoofers has been replaced by a vertical vent, down firing in 360°. The noise is filtered, the effects of internal standing waves are dampened, the positioning between the subwoofer and the wall is less critical, and the reproduction of bass is deeper and purer, always live and dynamic.

## SPECIFICATIONS

Position	Floorstanding
Way	1
Drivers	21 cm 21MT3
Frequency response	35 - 200 Hz
Lowpass frequency	30 - 180 Hz
Maximum sound pressure	88 dB
Low level input	1 RCA
High level inputs/output	Stéréo
Nominal power	200 W
Peak Power	400 W
Dimensions (h x w x d)	33 x 33 x 35 cm
Weight	9,3 Kg
Finishes	Glossy Black, Glossy White, White
