# ABOUT MONITOR AUDIO

Monitor Audio Ltd is a British company and global specialist in hi-fi loudspeaker design. For over 40 years we've been incorporating stereo and surround sound systems and a range of sonically matched architectural speakers for ultra discreet high quality sound around the home and outside.

Stereo / Surround sound systems

Custom Install / Architectural speakers

## Monitor Audio Custom Install

By choosing Monitor Audio Custom Install products, you're securing the utterly desirable combination of seamless integration and superior sound quality, backed by decades of design innovation and award success. We distribute to over 80 countries worldwide. Please refer to our website [monitoraudio.com](https://www.monitoraudio.com)

# WHY CHOOSE MONITOR AUDIO CUSTOM INSTALL SOLUTIONS

Monitor Audio's Custom Install products are engineered for high performance, reliability and ease-of-use. They've been developed using the advanced driver technologies of our award-winning hi-fi speaker ranges to deliver world-famous sound quality without compromising room design.

Available across varying performance levels, Monitor Audio's architectural speakers bring innovation to every application – wherever you decide to experience dynamic music and film sound, there's an In-Ceiling or In-Wall speaker that's perfect for the role. The speakers are expertly optimised for rhythmic wideband audio, seamless room integration and easy, secure installation.

If you love your décor and appreciate great audio, you needn't compromise: Monitor Audio's architectural speakers will create harmony all around your home.

## Main features

Audio solution for diverse spaces and applications

Solid and reliable build quality

Quick, easy and more secure install

High quality sound performance

Minimum cut outs

Minimum mounting depths

Magnetic attachment round and square grilles

Vertical or horizontal orientation

Patented Tri-Grip mounting clamps

## Range features

Super Slim and Slim

Back Box solution

Flush Fit

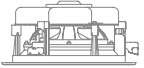

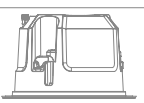

Invisible

Weather Resistant solution

# CUSTOM INSTALL NAMING SYSTEM

Monitor Audio's Custom Install products are named based on their application, technologies, driver sizes and special features.

Example

## C265-IDC

There is explanation of our technology mentioned above on the next page.

# TECHNOLOGY

Below is a brief description of each advanced technology used in our award-winning speakers. To achieve a harmony of space and sound for every possible application, we've created a wide range of options across varying performance levels.

## DRIVERS

**MMP II Driver:** Metal Matrix Polymer driver cones have a polypropylene base loaded with metallic particles to offer a rigid and responsive structure.

**C-CAM Driver:** Ceramic-Coated Aluminium Magnesium cones have a much higher resistance to bending stress and therefore exhibit much greater fidelity over their entire operating range.

**C-CAM RST Driver:** Rigid Surface Technology cone developed and perfected using sophisticated computer modelling (Finite Element Analysis). The strengthening effect of RST means that we can use thinner, lighter and more responsive C-CAM cones, providing speed and accuracy with reduced distortion.

**RDT II Driver:** Rigid Diaphragm Technology 2nd Generation is a composite 'sandwich' structure made from ultra-thin low mass skins, bonded to a honeycomb Nomex® core material. Very light and very strong, responds with great speed without bending. RDT II uses C-CAM for the front skin, while the rear skin is made from a woven carbon fibre material. This structure reduces distortion by over 8 dB above 300 Hz.

## TWEETERS

**C-CAM Gold Dome Tweeter:** The Gold Dome tweeter is formed from a Ceramic-Coated Aluminium Magnesium alloy, Gold anodised to a specific thickness for ideal stiffness and damping characteristics. Thinner, lighter, more rigid and more efficient than domes made from other materials which are prone to distortion in the audio band.

**Ribbon Transducer:** An ultra-thin sandwich of C-CAM alloy suspended in a powerful transverse magnetic field of high energy NeFeB rare earth magnets. The ribbon serves as both voice coil and radiating diaphragm, with every part of the ribbon driven directly and simultaneously without energy storage. The diaphragm is specified to reach ultra-high frequencies up to an elusive 100 kHz.

**MPD High Frequency Transducer:** Micro Pleated Diaphragm high frequency transducer uses a proprietary low-mass pleated diaphragm with a surface area eight times larger than that of a traditional dome tweeter. MPD transducers work like a super-fast accordion by rapidly squeezing the pleats to produce a smooth, wide, naturally fast response up to 100 kHz.

## SPECIAL FEATURES

**IDC Driver Module:** Inverted Dual Concentric pivoting mid-range/tweeter module with up to 18 degrees of adjustment in all directions. Sound can be directed toward the desired listening area.

**T2 Dual Tweeter Configuration (Stereo):** Dual, independent, pivoting 1" C-CAM tweeters and dual wound voice coil bass drivers for high performance stereo sound.

**FX Dual Tweeter Configuration (Surround):** FX speakers are ideal for surround or rear channel use in home cinema applications for a fully immersive experience.

**Adjustable Response Controls:** Optimum imaging and set-up are established via pivoting tweeters, pivoting IDC driver modules, high-frequency, mid-range-frequency, and/or boundary compensation controls.

**Patented Tri-Grip Mounting Clamps:** The Tri-Grip mounting clamps have three clamping points per dogleg. Providing a better seal between the speaker and the ceiling.

# Slim

Having a physical depth of less than 4" / 100 mm, the Slim models are perfect for easy installation in many more locations, being ideal for standard stud walls and where depth is restricted. Integrating the bass driver basket with the frame, our engineers have reduced overall speaker size by 25% over conventional speakers without any performance penalty.

### WSS430

The WSS430 uses concepts and materials taken directly from our flagship Platinum II speakers. Almost every component is unique to this model, created to deliver the most critical of audiophile and cinema experiences with superlative ease. The WSS430 MPD high frequency transducer is designed to rotate 90° to suit the chosen speaker installation.

# Controlled Performance

The Controlled Performance (CP) range is fitted with fully-sealed back boxes that provide an ideal air load for the drivers, optimising mid-range and bass performance while maintaining sonic consistency regardless of interior wall construction. These rigid, mineral filled enclosures reduce the sound from the back of the cabinet by around 30 dB. This range guarantees excellent audio quality and versatility, for superior level of sound isolation between rooms and floors.

# Controlled Performance

## Performance Full Size

CP-IW460X

### Performance Full Size

The CP-IW260X and CP-IW460X In-Wall designs have overcome the challenges of scale to deliver the natural, full range audio energy you'd expect from a free-standing high-end box. In a leap of engineering ingenuity, we've distilled the know-how driving our hi-fi speakers into a super-compact In-Wall format. Dedicated music lovers and home theatre fans can enjoy the rich, detailed, high-impact dynamics they crave, from a speaker that physically disappears in the room. Both Full Size models can be installed in vertical or horizontal orientations, with the high frequency ribbon transducer of the CP-IW460X designed to rotate 90° to suit the chosen speaker placement.

Sensitivity (1W@1m)	89 dB
Cut Out Dimensions (H x W)	34 <sup>21/32</sup> " x 9" / 880 x 230 mm
Mounting Depth	3 <sup>3/4</sup> " / 96 mm

Driver Size & Technology	2 x 6 <sup>1/2</sup> " C-CAM RST bass drivers 2 x 4" C-CAM RST mid-range drivers High frequency ribbon transducer Die-cast alloy bass driver chassis provides rigidity; results in punch bass and clean mid-range performance due to reduced transfer of vibrations HF & MF level switches Boundary compensation switch Innovative HF tweeter rotating system to facilitate vertical or horizontal orientation
Pre-Construction Bracket	WB12 (Green)

# Controlled Performance

At only 3<sup>1</sup>/<sub>8</sub>" / 80 mm diameter, Monitor Audio's CPC120 is a loudspeaker that offers extraordinary sound quality for a truly innovative application. Its precision engineered micro design allows it to offer a surprisingly coherent and detailed performance from a standard GU10 sized halogen down-lighter hole. The CPC120 can be specified with three different grille bezel options.

## In-Ceiling GU10 Size

Sensitivity (1W@1m)	85 dB
Cut Out Diameter	2 <sup>1</sup> / <sub>2</sub> " / 65 mm
Mounting Depth	3 <sup>5</sup> / <sub>8</sub> " / 91.5 mm
Power Handling (RMS)	20 W / 50 W using a crossover @ 200 Hz
Impedance	8 ohms
Driver Size & Technology	2" Full range micro-driver Sealed back box Quick and easy discreet flush fitment to ceilings or walls Conventional fitment clips offer quick and simple installation Available in three finishes (brushed steel, white and brass)

# Flush Fit

For ultimate visual appearance use the aesthetically attractive Flush Fit CF230 speaker. It's flexible and can be used on its own or in multiples. Set up as a 2.1 system with complementary ICS-8 subwoofer it will out perform traditional Custom Install speakers. It comes in a choice of install options: 1. Flush Fit or 2. Retrofit with round and square grilles.

## In-Ceiling

### CF230

Sensitivity (1W@1m)	82.5 dB
Cut Out Diameter	Flush Fit 4 <sup>3/4</sup> " / 120 mm
	Retrofit 3 <sup>9/16</sup> " / 90 mm
Mounting Depth	3 <sup>5/16</sup> " / 83.5 mm
Power Handling (RMS)	30 W – Full range – IEC268-5 rating 100 W – Music program (Using High Pass crossover filter @120 Hz)
Impedance	8 ohms
Driver Size & Technology	3 <sup>1/2</sup> " Bass/mid-range driver, featuring C-CAM cone 3/4" C-CAM Gold Dome tweeter
Brackets	1. Flush Fit – CFB3-R (round grille) or CFB3-SQ (square grille) Pre-construction bracket included in above kits 2. Retrofit – CFB3-KIT (round and square grilles)

Installation Guide video available, scan the QR code or visit:  
[vimeo.com/monitormedia/cf230](https://vimeo.com/monitormedia/cf230)

### CFB3-R (Round) and CFB3-SQ (Square) – Pre-Construction Flush Fit Brackets

In a pre-construction set-up, the CF230 package enables a seamless, flush fit appearance. You get clean lines, with no shadow-creating edges, and paint the grille to match the ceiling and the speaker disappears even further into the background. Order either **round** or **square** option.

### CFB3-KIT – Retrofit Bracket

The CFB3-KIT retrofit installation kit cleverly provides a firm fixing behind plasterboard/Sheetrock and requires just three screws to complete the fit.

**NOTE:** The retrofit option is not flush fitting and the grille will sit slightly proud of the ceiling surface.

The CF230 is installed using one of the brackets featured above. The Pre-Construction Flush Fit (new build) and Retrofit (existing) options are key to upholding its flexibility claims. Its ability to fit into any set-up means that the speaker is easier to install and more economical than other models.

Compatible product for this range:  
In-Ceiling Subwoofer ICS-8.  
[See page 30 for details.](#)

# Invisible

An invisible audio soundstage is a powerful attraction for homeowners, architects and designers. When so much is invested in creating a beautiful interior space, then it can be difficult to compromise that aesthetic with unsightly speaker grilles. The IV140 invisible speaker delivers 'best in class' audio performance in concealed In-Wall and In-Ceiling applications. It meets the demands of designers, installers and end users by providing ultimate discretion with easy to fit installation and high performance. The IV140 fits into all conventional 4" stud bays, leaving enough room for cabling. Once installed and skimmed with plaster, the speaker is completely out of sight, with paint, light wallpaper or fabric hiding it from view. Large low frequency transducer and two high frequency transducers provide punchy, high power bass and sound vibration. Integrated back box design isolates sound and ensures consistent controlled performance with an optional removable acoustic cover for more bass if required.

# Perfection Elevated

## PLATINUM II In-Ceiling Speaker

### Platinum II Technology

**RDT II (Rigid Diaphragm Technology 2nd Generation) Driver:** A composite 'sandwich' structure made from ultra-thin low mass skins, bonded to a honeycomb Nomex® core material. It is very light and very strong, meaning that it can respond with great speed without bending – just like a perfect piston. RDT II uses C-CAM for the front skin, while the rear skin is made from a woven carbon fibre material. We discovered that the new structure reduces distortion by over 8 dB above 300 Hz, which makes RDT II the lowest distortion cone technology in Monitor Audio's history.

**MPD (Micro Pleated Diaphragm) High Frequency Transducer:** Developed over many months of intensive testing and listening, the MPD High Frequency Transducer is a landmark achievement by the engineering team for Platinum II. It represents an imaginative re-working of an existing technology, transforming a successful idea into an audiophile super-driver, having greater accuracy and efficiency than ever before. Using, proprietary low-mass pleated diaphragm with a surface area eight times larger than that of a traditional dome tweeter. The MPD transducer works like a super-fast accordion by rapidly squeezing the pleats to produce a smooth, wide, naturally fast response up to 100 kHz. As a result it sounds more lifelike, releasing the high harmonic spectrum of every note without the distortion that blurs definition.

# PLATINUM II

For over 7 years, Monitor Audio engineers have been working towards the unveiling of the Platinum II flagship range. With our most advanced driver, crossover and acoustics systems set within luxurious cabinets, we've tuned the virtues that have won Monitor Audio worldwide acclaim to a new intensity, allowing rarefied audio transparency to be revealed and enjoyed. Platinum II is our magnum opus, as inspirational and satisfying to us as we hope it will be to you.

## In-Ceiling

### PLIC II

The PLIC II In-Ceiling speaker offers unsurpassed levels of performance, delivering sublime audio accuracy. Providing a winning combination of high quality sound, ease of installation and discreet design, this speaker will be a firm favourite with home technology installers, architects, interior designers and end users.

Sensitivity (1W@1m)	90 dB
Cut Out Diameter	10 <sup>3/4</sup> " / 273 mm
Mounting Depth	7 <sup>5/16</sup> " / 185 mm
Power Handling (RMS)	150 W
Impedance	4 ohms Nominal (3.1 ohms minimum @ 1.1 kHz)
Driver Size & Technology	8" long-throw RDT II bass driver 2 x 2" C-CAM mid-range drivers – full three-way design MPD high frequency transducer Angled mid-range and high frequency drivers – directed towards listening area to provide uniform mid and high frequency dispersion High-performance 'no compromise' flagship speaker product Rigid aluminium baffle construction Highest quality 'push' style termination Mid-range and HF level adjustment switches (+1/0/-1 dB) Paintable, trim less/low profile circular magnetic grille design – square option available Highest quality crossover design – including metallised polypropylene capacitors and low loss inductors Patented Tri-Grip mounting clamps
Pre-Construction Bracket	CB10 (Light brown)
Back Box	PLIC-BOX II – specially designed pre-construction enclosure provides ideal controlled performance or a bespoke sealed enclosure of 24 Litres

### Platinum II In-Ceiling Back Box

Overall Dimensions

7<sup>1/2</sup> x 24<sup>3/4</sup> x 13<sup>3/4</sup>"  
191.2 x 628.6 x 350 mm  
Internal volume 24 L

### PLIC-BOX II

To ensure controlled audio performance for the PLIC II, Monitor Audio has designed an optional pre-construction MDF back box with pre-determined air volume of 24 L. The rigid box is available with pre-loaded internal damping material to provide the best possible sound absorption and reduce standing waves.

# PLATINUM II

## In-Wall

Platinum In-Wall II

The Platinum In-Wall II is a three-way reference architectural speaker system, perfect for custom home theatre projects where lifelike scale and dynamics are demanded. Equipped with an adjustable mid/high frequency driver array, this unit is able to deliver pin-point audio imaging and consistency from both vertical or horizontal orientations. By rotating the array though 90 degrees at the centre of a LCR configuration for instance, a soundstage of three Platinum In-Wall II's will generate the seamless tonal integrity of the finest boxed systems from a stealthy In-Wall location.

Sensitivity (1W@1m)	90 dB
Cut Out Dimensions (H x W)	46 1/4 x 11 13/16" / 1175 x 300 mm
Mounting Depth	3 13/16" / 97.5 mm
Power Handling (RMS)	200 W
Impedance	4 ohms (3.7 ohms min. @ 2.8 kHz)
Driver Size & Technology	2 x 6 1/2" RDT II bass drivers 4" RDT II mid-range driver MPD high frequency transducer Mid-range/tweeter module rotates for vertical or horizontal orientations HF & MF level switches (+1/0/-1 dB) Flagship In-Wall luxury speaker Less than 4" mounting depth

Platinum In-Wall II can be installed in vertical or horizontal orientations

# Pro Speakers

The PRO range is ideal for projects with large quantity of compact speakers for example in spaces like shopping malls, hotel lobbies, restaurants, office complex and general domestic use. It brings to custom installers highly flexible ultimate compact architectural speakers, with driver technology refined to deliver unparalleled sonic performance and increased flexibility in discrete installations.

**PRO-80LV**  
commercial speaker with  
70/100 V line power taps  
Ideal for projects with a large quantity  
of speakers over large distances. It  
also provides flexible design options  
configured in line level.

# Weather Resistant Speakers

# All Weather

The All Weather In-Ceiling series has a weatherproof construction for installation in more extreme environments such as bathrooms, beach houses, saunas or even boats. It offers long-term high performance reliability being built with heightened levels of water, dust, corrosion, UV and temperature protection. These speakers feature super-discreet Stainless Steel grilles and are certified against salt spray, UV stability, water, vibration and anti-corrosion. Operating temperature range: -29° to 174° F / -34° to 79° C.

# Climate

With the advent of the versatile Climate range, no environment is beyond the reach of great sound, whatever the weather! This range is certified to be resistant to UV, corrosion and water. Wall mounted in any combination, it provides a wide and even dispersion of full range sound over large areas. Low frequencies are augmented from an Auxiliary Bass Radiator (ABR) in each cabinet. Paintable textured white or black finishes with weatherproof aluminium grilles. Operating temperature range: -13° to 149° F / -25° to 65° C.

# Climate Garden System

The Climate Garden System comprises of super discreet all weather satellite speakers and a subwoofer. It's ground level installation amongst shrubs and trees delivers a luxury blend of unobtrusive aesthetics and natural full range audio in gardens of any size. 70/100 V line arrays of up to twelve satellites per subwoofer makes the Climate Garden System expandable with additional satellite and subwoofer sets according to garden area. Operating temperature range: -4° to 158° F / -20° to 70° C.

## In-Ceiling

ICS-8

ICS-8 is a high performance subwoofer, designed to fit into discreet spaces, such as ceiling and wall cavities. It's been developed primarily to complement the CF230 Flush Fit (Page 19) to delivering powerful bass where a full range system is required. The 8" driver has been angled internally in the rigid MDF enclosure, to reduce the overall box height and ensure compatibility with a wide range of standard construction cavities. It can be installed in ceiling, underfloor or suitable cavities and is designed to complement flush fit downlighting systems. Sealed bandpass enclosure design stops ingress of dirt and building materials. Delivering powerful bass down to 40Hz.

Sensitivity (1W@1m)	85 dB
Overall Cabinet Dimensions (H x W x L):	9 <sup>1/4</sup> x 11 x 15 <sup>9/16</sup> " 235 x 280 x 396 mm
Power handling	150 W – Full range – IEC268-5 rating
Impedance (nominal)	8 ohms
Driver Size & Technology	8" long throw bass driver, featuring C-CAM cone technology
Pre-Construction Bracket	CFB3-R (round grille) or CFB3-SQ (square grille) Pre-construction bracket included in above kits

CFB3-R Flush Fit round grille

CFB3-SQ Flush Fit square grille

### Pre-Construction Flush Fit Brackets

The ICS-8 is installed using one of the brackets featured below.

# Custom Subwoofers

## In-Wall

The In-Wall Subwoofer design is an amalgam of sophisticated IWS-10 subwoofer driver, IWA-250 amplifier and IWB-10 back box. The IWS-10 is specified to produce excellent bass quality in a range of wall, ceiling, even floor locations, ideally but not exclusively with its IWB-10 back box.

### IWS-10

Sensitivity (1W@1m)	86 dB
Cut Out Dimensions (H x W)	11 x 11" / 280 x 280 mm
Mounting Depth	3 1/2" / 90 mm
Power Handling (RMS)	150 W
Impedance	8 ohms
Driver Size & Technology	10" C-CAM RDT driver Less than 4" mounting depth Ideally but not exclusively pairs with its IWB-10 back box Patented Tri-Grip mounting clamps
Back Box	IWB-10 (In-Wall Back Box)

### IWB-10 (In-Wall Back Box)

3 1/32"  
85 mm

IWB-10 shown with installed IWS-10 and grille

Overall Dimensions (H x W x D) :  
33 1/2 x 13 13/16 x 3 11/32" / 850 x 351 x 85 mm  
Internal volume 16.5 L  
Designed to provide optimum performance for IWS-10  
Fits into standard 14" stud bays (16" centres)  
Reduces the radiation of sound to adjacent rooms  
Heavy duty MDF construction  
Rugged laminated vinyl finish  
Pre-wired with external high quality push type terminals  
Supplied with mounting brackets for installation

## IWA-250 Amplifier

### IWA-250

Input Impedance	> 20 K ohms
Overall Dimensions (H x W x D):	1 3/4 x 17 x 10 3/8" 43.7 x 432 x 263 mm
Technology	Heavy-duty 1U rack mount case Will power single or dual IWS-10s Switch mode power supply DSP controlled with advanced limiters <0.5 W standby power consumption (ErP certified) DC short circuit protection, over-current and thermal protection Supplied with rack mounting brackets for installation
Amplifier Power Output	250 W @ < 1% THD+N
Amplifier Classification	Class D amplifier with Switch mode power supply (SMPSU)

The IWA-250 switch mode amplifier – a slim, powerful design in a heavy-duty 1U rack mount case. Delivering up to 250 W into 4 ohms, a single IWA-250 will power single or dual IWS-10s to provide higher power levels for larger rooms or to meet customer demands. The IWA-250 has input signal sensing, or is triggered from an AVR or other system source.

### CLG-W12

There is a subwoofer available for the Climate Garden System.  
Please view Page 29 for full details.

# Amplifiers

AVAILABLE  
February 2018

Introducing the Monitor Audio Installation Amplifiers, built to do more and use less space, featuring cutting-edge technology for the best sound performance in any installation project. The multi-channel amplifiers can be used in a wide range of applications in residential and commercial properties with power up to 2000 watts. Audio channels can be grouped or bridged for flexible installations, configurable to 1,2,3,6,8 or 12 channels. We have selected the world renowned Hypex amplifiers to guarantee reliability and the great sound quality you'd expect from Monitor Audio, reduced into slim 1U and 2U high cases that universally fit into most racks whilst delivering 93% energy efficiency. Auto ranging allows for use in any territory without the need for a separate power supply. The amplifier names all begin with 'IA' for Installation Amplifier, followed by their power in watts per channel at 4 ohms, the number of channels and a 'C' if it's IP connected. Installation amplifiers to suit any project.

There are two types on amplifiers in the range;

Distribution amplifiers – Full connectivity with simple wired voltage trigger or signal sense

Connected 'Connect' amplifiers with more complex DSP and IP control included – Offering wider flexibility and integration

## Distribution Amplifiers

# 'Connect' Amplifiers

## 'Connect' IP interface

IA800-2C / IA200-2C / IA150-8C

Our 'Connect' IP interface is a web application, which can be accessed by any device connected to the internet with a web browser on the same network. This will allow the installer to set features and fine tune audio performance remotely from the amplifier location. The installer can therefore be in the same room as the speakers when performing these tasks.

## IA800-2C

## Features – All Amplifiers

- Power Switch** – Front panel mounted
- Status LED** – Indicating standby, power on or protect modes
- Signal LED's** – Indicating a signal is present at each channel independently. It will also indicate clipping
- Power Options** – Trigger input – 3 – 30 V AC or DC. A trigger output supplies provides signal for additional amplifiers or other equipment.
  - Audio – Auto signal sensing or permanently on
- Speaker Connections** – Industry standard removable block connectors accepts up to 12 gauge (3.5 mm2) cable

## Additional Features – Distribution Amplifiers

- Volume Level Controls** – Each channel on the amplifier has a volume adjustment on the rear panel
- IA150-2** – Both Line Inputs and Loop Outputs – To connect other amplifiers/equipment
- IA60-12** – Buss Inputs A/B and loop Outputs – Loop outputs are non buffered (maximum number of amplifiers that can be looped together will depend on the output capability of your source component)

## Additional Features – 'Connect' Amplifiers

- Higher power levels**
- Volume Level Controls** – Each channel on the amplifier has a volume adjustment on the front panel
- 'Connect'** – IP control is via the RJ-45 input. IP controls power On/Off, volume, muting and input source selections for either global control or group control
- IR Control** – In/Out jacks. IR controls global On/Off, group volume, muting and input source selections. Connectivity can be seen with IR status light
- IA800-2C** – Can drive 70 V line speakers directly without a line matching transformer

# Soundbars

## Active Soundbar

### Free Standing / On-Wall

Expertly engineered to re-energise HD and UHD pictures with the rich, detailed, immersive sound you've been missing. Your experience of TV is about to be transformed with this 2.0 Active Soundbar. Four Class D amplifiers, Digital wireless 2.4 GHz transmitter, Dolby Digital, Dolby Pro-Logic II and Dolby Virtual speaker.

# SoundFrames

## In-Wall / On-Wall

The SoundFrame range provides the elusive blend of superior sound and décor that all style-conscious home entertainment lovers seek. They are easy to install with On-Wall and In-Wall options, pivoting drivers for the ideal audio balance, and a wide range of grille colours, images and custom grille designs. Keyhole fixings for On-Wall and pre-fix corner brackets for the In-Wall models make the process routine, and for a brilliant wire-free look, the connecting cable runs in the wall cavity, enters from the back and is connected at the front.

Grille

## Vertical or horizontal orientation

When ordering your SoundFrame state if you require the In-Wall or On-Wall options. Order Black Gloss or White Gloss finish.

# Customise your SoundFrame Grilles

Standard grilles can be customised by purchasing replacement artwork from our extensive library of images or flat colours to match any décor. Or if the customer prefers they can provide a bespoke image of their choosing which can be printed and mounted onto a grille to fit any of the three sizes of SoundFrame. Both these options can also be created using our larger Frameless grilles where the outer frame is also removed.

Option 1:  
Library Grille

Fine art artwork example

Option 2:  
Bespoke Grille

Bespoke image on SoundFrame 1

Options 1 & 2:  
Frameless Grilles

Black Frameless grille

Small selection of our library grilles available, for the full selection please visit:  
[monitoraudio.co.uk/products/soundframe/grille-options](http://monitoraudio.co.uk/products/soundframe/grille-options)

Bespoke image on SoundFrame 2

Library image  
Frameless grille

Bespoke image  
Frameless grille

Please contact your local dealer to place an order for a bespoke grille. There are file specifications in place to achieve best results please only use high resolution images.

The larger frameless grilles replace both the grille and frame to give the impression of an edgeless image. Plain Black or White options available.

When ordering your customised SoundFrame grille, state which image you require, which size of SoundFrame and if you prefer the framed or frameless option.

# Accessories

## Pre-Construction Brackets

Pre-Construction brackets are available for speakers as an accessory to help mark speaker placement during framing and prior to sheetrock application. The brackets will span up to 24" stud spacing. Pre-Construction brackets are not required for retrofit applications.

## In-Ceiling Concrete

### CCBOX-R

Overall dimensions:  
13 x 13 x 4<sup>15/16</sup>" / 330 x 330 x 125 mm  
Internal depth (max.): 4<sup>1/2</sup>" / 115 mm  
Internal volume 6.31 L

### CCBOX-L

Overall dimensions:  
13 x 13 x 6<sup>1/2</sup>" / 330 x 330 x 165 mm  
Internal depth (max.): 6<sup>1/8</sup>" / 155 mm  
Internal volume 8.9 L

Prior to pouring a concrete ceiling the CCBOX-R (regular) or CCBOX-L (large) allows you to create a placeholder ready for In-Ceiling speakers to be installed. They are lightweight and at the same time offers a robust stability with excellent shock absorption features. Three cut out sizes offer unlimited possibilities, with two side cut outs allow for best possible handling of electronic ductwork (20 mm + 25 mm). Better insulation with airborne and structure-borne noise compared to conventional In-Ceiling systems. Concrete rings and installation components provided so that all conventional speaker systems will fit perfectly.

Installation Guide video available, scan the QR code or visit:

[vimeo.com/monitoraudio/ccbox](https://vimeo.com/monitoraudio/ccbox)

## In-Wall Concrete

### WCBOX-L

Overall dimensions:  
23<sup>1/4</sup> x 17<sup>1/8</sup> x 4<sup>3/4</sup>" /  
590 x 435 x 120 mm  
Internal depth (max.):  
4<sup>1/8</sup>" / 105 mm  
Cut out dimensions:  
15<sup>1/4</sup> x 9<sup>3/16</sup>" / 387 x 234 mm  
Internal volume 14.8 L

The WCBOX-L (large) allows you to install In-Wall speakers into concrete or brick walls. With the front and rear Fermacell boards, the WCBOX-L will seamlessly integrate into your installation workflow, enabling a quick and easy processing of the walls surface. The body material is framed by EPS to achieve low resonances and improved sound insulation features. The WCBOX-L is lightweight and at the same time offers a robust stability with excellent shock absorption features.

Installation Guide video available, scan the QR code or visit:

[vimeo.com/monitoraudio/wcbox](https://vimeo.com/monitoraudio/wcbox)

## In-Ceiling MDF

### CMBOX-R

Overall dimensions:  
11<sup>13/16</sup> x 13<sup>3/4</sup> x 6<sup>5/16</sup>" /  
300 x 350 x 160 mm  
Internal volume 12.2 L

The CMBOX-R (regular) is a Back Box made of MDF, which allows you to install speakers from our Core, Slim and All Weather ranges into the ceiling. Comes with Small and Large Ring (fitted) adapters, which can also be removed.

No Ring 250 mm

Large Ring (Fitted) 218 mm

Small Ring 173 mm

# Back Boxes

## Product Back Boxes

### Platinum In-Ceiling II Back Box

Overall Dimensions (Including Brackets):  
 $7\frac{1}{2} \times 24\frac{3}{4} \times 13\frac{3}{4}$ " / 191.2 x 628.6 x 350 mm  
 Internal volume 24 L

#### PLIC-BOX II

To ensure controlled audio performance for the PLIC II, Monitor Audio has designed an optional pre-construction MDF back box with pre-determined air volume of 24 L. The rigid box is available with pre-loaded internal damping material to provide the best possible sound absorption and reduce standing waves.

[See Page 23 for more details.](#)

### In-Wall Subwoofer Back Box

IWB-10 shown with installed IWS-10 and grille

Overall Dimensions (H x W x D) :  
 $33\frac{1}{2} \times 13\frac{13}{16} \times 3\frac{1}{32}$ " / 850 x 351 x 85 mm  
 Internal volume 16.5 L

#### IWB-10 (In-Wall Box)

- Designed to provide optimum performance for IWS-10
- Fits into standard 14" stud bays (16" centres)
- Reduces the radiation of sound to adjacent rooms
- Heavy duty MDF construction
- Rugged laminated vinyl finish
- Pre-wired with external high quality push type terminals
- Supplied with mounting brackets for installation

[See Page 31 for more details.](#)

## Square Grilles

All-round performance in a square.  
 Designed to suit contemporary interior styling, our alternative square grilles are available for numerous In-Ceiling speakers shown below.

# HOME THEATRE SYSTEMS

## In-Ceiling 5.1 Home Theatre

Our Custom Install speakers and accessories can be used to create an amazing Home Theatre system using either In-Ceiling or In-Wall or a combination of both. There are a number of optimum layouts and positions that will enhance your sound and listening pleasure.

All our Custom Install products can be used in conjunction with our traditional speaker ranges. To find out more about our speaker ranges please visit [monitoraudio.com](http://monitoraudio.com)

Platinum II

Silver 6G

## In-Wall 7.1 Home Theatre

- A Front Left-Centre-Right main loudspeakers
- B Rear Left-Right surround loudspeakers
- C Add your choice of Monitor Audio subwoofer to complete the theatre
- D You can use In-Wall front IDC loudspeakers with In-Ceiling Left-Right surrounds if desired
