Our Townus series - timeless and elegant

3D Home cinema sound for your home

With this Dolby Atmos speaker, which is perfectly matched to the Townus series, you can expand your home cinema with cinema sound from the third dimension. The Townus AR-5 Dolby Atmos Enabled Speakers are optimally equipped with high-quality titanium and aluminium manganese membranes, the latest generation of wave surrounds and selected crossover components. The result: unique and genuine Canton sound with high power handling and compact dimensions. They can be used universally as top speakers for your home cinema system or as stereo or effect speakers with wall mounting. Rounded cabinet edges, the screwless integration of the drivers into the baffles and the shapely fabric covers give the Townus AR-5 a highly attractive face - a welcome addition to your home cinema system.

Beste Technik

The Townus AR-5 are versatile 2-way compact speakers: as "Dolby Atmos Enabled Speakers" they are placed on the front and/or rear speakers of your Townus home cinema system. Alternatively, the compact models can be used universally as stereo or effect speakers, either individually or hanging on the wall in an existing home cinema system. The integrated wall bracket allows for unproblematic mounting on the wall. The Townus AR-5 uses excellent technical components: 154 mm titanium bass-midrange driver and 25 mm tweeter with aluminium-manganese cone and transmission front plate ensure excellent sound and best radiation behaviour. The 24-carat gold-plated screw terminals with a receptacle for cable cross-sections of up to 10 mm² guarantee maximum conductivity and long-term stable contact.

Elegante Gehäuse

The compact Townus AR-5s are visually simple yet elegantly designed. They are the ideal complement to our Townus range, perfectly matched both visually and technically, and can also be used as universal top speakers for a wide variety of bookshelf and floorstanding loudspeakers. The closed cabinets of the attractive Dolby Atmos speakers are of extremely solid construction. The flawless surfaces in silk matt or high-gloss lacquer and the elegant walnut real wood veneer with perfect finish underline the premium claim of the new Townus speaker series. Rounded, magnetically adhering fabric covers in black colour complete the simply elegant and modern appearance of our Townus AR-5.
