

FINISHES

The Borea BRA1 speakers, dedicated to the reproduction of sound effects, are an ideal complement to your home theater set-up.

Thanks to their adjustable crossover, they can be used as follows:

- As vertical 3D effects: The speakers are placed on top of the main speakers, with the BRA1 angled up, using the sound wave reflection principle.
- As horizontal effects: The speakers are placed on the back or side walls thanks to their dedicated mounting

system. With an angled front, the BRA1s allow for precise and direct targeting of the sound waves towards the listener. *auditeur.*

Build a powerful home theater system that ranges from a 3.1.2 to a 9.2.4 configuration and enjoy clear, dynamic, and precise sound for an immersive and heart-pounding experience.

** The BRA1 can be placed on the BR03, BR07, BR08 and BR09 speakers of the Borea range.*
