

# Introducing 3000 generation c

Q Acoustics' latest affordable, high-performance loudspeaker series, featuring C<sup>3</sup> Continuous Curved Cone™ design

## Genuine innovation

British audio specialist, Q Acoustics, introduces the affordable and high performance 3000c loudspeaker series. Building on the formidable legacy of the 3000i - Q Acoustics' most popular and decorated speaker series - this new range continues the company's unwavering track record of delivering a sonic performance and high-quality design and build way beyond its class. The 3000c is the perfect entry-point into a modern audiophile world or as a cost-effective speaker upgrade.

The 3000c family is comprised of the 3010c bookshelf, 3020c standmount, 3030c larger standmount, 3050c floorstander, with the 3090c centre-channel completing the line-up for a home cinema speaker set-up.

## Key features

- New ground-up C<sup>3</sup> (pronounced 'C-cubed') Continuous Curved Cone™ mid/bass profile ensures superior bass dynamics and smoother integration with the high frequency driver.
- Based on design principles found in the newest Concept series, the hermetically sealed high frequency driver unit is mechanically isolated from the baffle, preventing modulation from the mid/bass driver.
- Low colouration cabinets with P2P™ (Point to Point™) bracing, minimising low-end reverberation to improve the stereo image and soundstage.
- HPE™ (Helmholtz Pressure Equaliser™) tubes disrupt the build-up of standing waves, smoothing the frequency response and reducing distortion (3050c model only).
- Boasts a clean and contemporary aesthetic with sophisticated satin metallic driver trims.
- Available in four new finishes: Pin Oak, Claro Walnut, Satin White, Satin Black.

## C<sup>3</sup> Continuous Curved Cone™

This new speaker series features a C<sup>3</sup> Continuous Curved Cone™ mid/bass driver design, first introduced in award-winning 5000 series and the M40 powered micro-tower speakers.

A genuine advancement in elements of mid/bass driver design, the C<sup>3</sup> Continuous Curved Cone™ profile is the result of extensive research and expert engineering to combine the bass performance benefits of a traditional straight conic cone with the high/mid-range frequency control of a flared cone.

Q Acoustics latest technical platform elevates the 3000c above its peers to deliver a sound defined by an articulate and fast mid-range, controlled but powerful bass dynamics, and nuanced and detailed high frequencies, alongside an exceptional soundstage not previously experienced at this level.
