The 7000i Series

Style & Substance

7000i Series is a beautifully styled speaker range where the focus is on getting the biggest sound from the smallest, best-looking speakers. This is done by moving as much of the bass as is possible into a subwoofer, enabling us to make much smaller speakers for the front and surround channels, each with their mounting method as part of the clever design.

Moving away from a fibreboard cabinet gives more flexibility for getting the best acoustic shape and appearance. Of great importance is that there is enough overlap between the speakers and subwoofers bandwidth to ensure that they crossover seamlessly without any gaps or peaks. This has been done by giving the 'satellite' speakers enough low-frequency extension that they can even be used on their own for a second zone.

Room-Filling Sound From A Small Elegant Speaker System.

Unrivalled Sonic Performance

We demanded unrivalled sonic performance and breathtaking value for money. In the award winning 7000i Cinema Pack, our designers have surpassed themselves.

Its precision soundstage, powerful dynamics and rich deep bass make it the natural choice for both home cinema enthusiasts and discerning music lovers.

Adapting for Atmos immersive sound

There is a choice of adding in-ceiling speakers, where we recommend Qi 65CP or additional matching 7000i speaker modules, Q 7000LRi.

The optimal locations for the additional speakers should follow the Dolby Atmos Installation Guidelines.

The in-ceiling Qi 65CP should be positioned at these locations in the ceiling with their pivot tweeters pointed straight down.

Alternatively, the surface-mount Q 7000LRi should be positioned below these locations at around 1 metre from the floor, facing in the direction of the listener but angled at 45 degrees upwards. These can be shelf mounted, wall mounted or placed on the optional Q 7000FS floor stands.

Beautiful Inside and Out

Q Acoustics speakers have been designed to complement your chosen listening room.

Award-Winning Experience

7000i Series

7000i 5.1 Slim 5.1 Speaker System

The 7000i 5.1 Slim system has been designed for those who want a big sound from a very compact set of speakers, particularly the subwoofer, which at 150mm (6") deep is the slimmest we have produced so far. The Left, Right, Centre and Rear speaker enclosures are attractively designed D-shaped aluminium castings for low resonance. Its precision soundstage, powerful dynamics and rich deep bass create the perfect, discreet home cinema system.

7000i 5.1 Plus 5.1 Speaker System

The 7000i 5.1 system has been designed to fit seamlessly into a chosen room, to enhance the listening experience from every angle. The Left, Right, Centre and Rear speaker enclosures are attractively designed D-shaped aluminium castings for low resonance and the Subwoofer cabinet is a compact fibreboard cuboid. Its precision soundstage, powerful dynamics and rich deep bass create the perfect, discreet home cinema system.

7000LRi Satellite Speaker

These award-winning speakers were designed to get the biggest sound from the smallest, best-looking enclosures. The driver area of these speakers, in relation to the size of the enclosure gives the extra bandwidth required for these small stereo speakers to ensure they produce a big, pure sound. On each of the Speakers 2 x 75mm drivers are mounted in a D'Appolito configuration around a 25mm HF ring radiator.

7000Ci Centre Speaker

Identical to the left and right models aside from it being mounted horizontally and therefore delivers an absolutely seamless soundstage for the listener. In the Centre Speaker 2 x 75mm drivers are mounted in a D'Appolito configuration around a 25mm HF ring radiator. The driver configuration creates a virtual point source, perfect for cohesive voice reproduction.

7060S Slim Subwoofer Speaker

This extra compact Subwoofer has a 200mm driver driven by 150watt class D amplifier. At 150mm (6") deep it is the slimmest subwoofer we have produced so far, but is still as capable of reproducing the speed and 'twang' of a double bass as it is the prolonged, earth moving rumble of a 'block buster' explosion. the 7060S can also be wall mounted using an optional bracket.

3070S Subwoofer Speaker

The 3070S subwoofer perfectly complements all Q Acoustics 7000i stereo and centre channel speakers. Its twin, long throw, 6½ inch drive units and powerful 140watts RMS amplifier, enable the 3070S subwoofer to beautifully reproduce the fast 'twang' of a double bass just as well as exciting movie soundtracks.

7000i Stand Speaker Stand

The 7000i Speaker Stands are a perfect match for 7000i Speakers. The speaker base is removed and attaches directly to the stand with the cable running internally up the stand column. The stand base is made from stylish armoured glass so flooring can be seen through it.
