

Muro™ Series Thin Floorstanding Subwoofer with Amplifier

Adding a powerful bass foundation to music and soundtracks turns your system into a sensation you can feel as well as hear. The compact design allows vertical, horizontal or on-wall placement. Sophisticated app-control and built-in wireless receiver assure seamless integration into your system.

Muro Series Thin Floor Standing Subwoofer

The very thin design of this subwoofer allows it to be unobtrusive when standing up against a wall, or hidden underneath a couch etc. This makes the subwoofer versatile in its location placement to be as discrete as possible.

MURO SERIES THIN FLOORSTANDING SUBWOOFER FEATURES

120 Watt BASH Amplifier

BASH (Bridged Amplifier Switching Hybrid) amplifiers represent a “best of both worlds” solution for subwoofer amplification, combining the sound quality of Class AB with the efficiency of Class D amplifiers.

8” High Excursion Woofer

A custom 8-inch long-throw driver provides the quality and quantity of bass that is fundamental to accurately reproducing today’s demanding movie soundtracks and music.

Advanced Bluetooth Control

Doing away with traditional analog controls, the SUB2010 subwoofer incorporate ELAC’s advanced digital control system. Simply download the ELAC SUB Control 2.0 app for your smartphone and you will have complete control. No more fumbling around the back of the subwoofer again.

AutoEQ

Utilizing the ELAC SUB Control 2.0 app and your smartphone’s microphone, the SUB2010 subwoofer will automatically equalize to your room’s characteristics using a 12-band parametric equalizer. Manual adjustment is available as well

Flexible Mounting

The SUB2010 can be setup vertically or horizontally allowing greater flexibility in placement.

AirX2 Wireless Ready

The SUB2010 has a built-in AirX2 Wireless Receiver. Simply add the optional AirX2 Transmitter to allow for even more flexible placement.
