

Q Acoustics was established in 2006; not by a wealthy 'music lover' or retired 'rock musician' (who, in their marketing material, would inevitably claim to have spent decades being dissatisfied with all the speakers available and had therefore decided to make their own). Q Acoustics in contrast, was founded by professional engineers and businessmen with the sole aim of developing a highly successful loudspeaker brand.

It's that simple, a completely focussed, professional understanding of engineering business has driven our remarkable success. Because we recognised, long before anybody even dreamed of designing our first products; the only way Q Acoustics could possibly enjoy commercial success was to design and produce

loudspeakers which were, without question, demonstrably superior to their similarly priced competitors. In other words, we had to make the best affordable loudspeakers in the world.

So that's what we did.

Please do not misunderstand us. Although we have little history or tradition, we do have vast expertise. To produce the world's best loudspeakers, we obviously had to engage the world's best loudspeaker designers and provide unlimited access to the most advanced design and engineering facilities.

So that's what we did.

And that's what we continue to do.

CONCEPT 20: NOTHING SHORT OF SENSATIONAL

THIS EXCEPTIONAL PERFORMANCE HAS BEEN ACHIEVED BY USING BREAKTHROUGH TECHNOLOGY TO OVERCOME THE FUNDAMENTAL PROBLEMS OF SPEAKER DESIGN

Concept 20

The 'Concept 20' is a special loudspeaker which goes beyond anything that Q Acoustics has achieved before. It's a beautifully styled product which we confidently believe provides a level of sonic performance previously thought impossible at its price point.

To achieve this extraordinary result, Q Acoustics' design team applied advanced technology to address the fundamental problem of cabinet resonance, widely recognised as the single biggest hurdle preventing 'high end' sonic performance at an 'affordable' price.

The 'Concept 20' proves cabinet resonance need be a problem no longer.

Its Gelcore™ Construction, 'cabinet within a cabinet' design, incorporates a bespoke, resonance absorbing, non-setting adhesive which converts the kinetic energy and disperses it as heat. This substantially reduces distortion and allows the individual drive units to deliver their optimal performance.

The 'cabinet within a cabinet' Gelcore™ construction dramatically reduces resonances and colouration.

"Superb...a scale and volume of sound that seems scarcely credible from such a small cabinet"

Concept 40

The Concept 40 is Q Acoustics' flagship floorstanding speaker. It is the newest addition of the acclaimed, award winning Concept series and, like so many Q Acoustics models, delivers an unparalleled sonic performance at its price. We firmly believe the Concept 40 sets new standards, even outperforming many speakers in higher price brackets.

In common with the Concept 20, its award-winning 'little brother', the new Concept 40's extraordinary soundstage, dynamics and sheer musicality is achieved by incorporating its bespoke drive units into a 'Gelcore™ Construction' cabinet. This State-of-the-Art, ultra-low resonance and beautifully lacquered cabinet design allows the drive units to perform at their very impressive best.

The low distortion drive units incorporate powerful oversized magnets to ensure wide dynamics and an ultra-fast transient response. The elegant tripod stand allows the Concept 40 to achieve perfect rigidity and floor contact which further enhances its performance.

Even the speaker's attractive aluminium fascia plate is not purely decorative. It's part of an assembly which clamps a butyl rubber sheet to the front panel to reduce cabinet resonance still further.

With 90dB sensitivity and a nominal impedance of 6 ohms, the Concept 40 is easily driven by any good quality amplifier. This striking floorstanding loudspeaker is available in either high gloss black, or high gloss white finishes.

Concept 5.1 Cinema Pack

We are proud to announce the Concept 5.1 cinema pack. Movie lovers can now experience soundtracks and dialogue with the same unparalleled level of sonic performance that audiophiles already enjoy from the award-winning Concept stereo models.

This outstanding level of performance is achieved because the 'Concept' models incorporate 'Gelcore™ Construction' loudspeaker cabinets; the ground breaking technology, developed by Q Acoustics, which almost totally eliminates loudspeaker cabinet resonance – a major factor limiting the sonic performance of modern loudspeakers.

Wall mounting your speakers?

We have designed elegant 'floating' glass shelves to perfectly complement your Q Acoustics loudspeakers. Strong yet visually discreet; the bespoke, space saving shelves allow you to securely mount your bookshelf or centre speakers to suitable walls in your listening area.
