Compact Soundbar

Sound M: Powerful sound for a flat TV

Anyone who buys a flat TV today needs sound support for impressive movie sound and clearly intelligible dialog reproduction. Our brand new Soundbar Sound M helps you experience your favorite movies or sporting events in outstanding sound quality. And with minimal installation effort. Thanks to Virtual Surround technology, the Sound M delivers impressive surround sound from a compact cabinet that measures 725 mm wide and just 64 mm high and 100 mm deep. In the visually unobtrusive housing made of solid HDF, the finest Canton technology ensures powerful sound on your TV. Music playback from your cell phone or tablet is child's play with the easy pairing function and thanks to Bluetooth interface with apt-X lossless in the best sound quality.

High quality technology makes the best sound

Four 50 mm woofers and two 19 mm tweeters in a 2-way configuration provide the Sound M with precise, detailed mids with excellent dialog reproduction and crystal-clear highs. With the support of 300 watts of system power and two large passive radiators, the compact soundbar succeeds in delivering impressive bass. Thanks to the 4K-compatible HDMI ports, the TV and up to three other playback devices can be connected to the Sound M quickly and conveniently. Using the on-screen display on the TV, you can easily configure and control your soundbar with the included remote. In addition, the Sound M soundbar has an optical digital input as well as a coaxial digital and an analog RCA input.

Elegant, classy and versatile

The top made of heat-treated and polished glass gives the Sound M a noble look. The cabinet, which is only 6.4 centimeters high and has high-gloss lacquered surfaces, looks magnificent in any living room and transforms your room into your very own private home theater palace in no time. With its many talents, our Sound M can be used not only as a solo soundbar: it can be easily expanded with two Canton Smart speakers as surround speakers and a Canton Smart Sub. If you wish, it can even be transformed into a pure center speaker if you are looking for a particularly compact and flat speaker. Ideal if there is only little space available below the TV and you already have a Smart Amp or Smart Connect, which then control the Sound M as a center.
