STEREO
Issue 01/19
PLATINUM+ nine
Price/performance: **VERY GOOD**

New PLATINUM⁺ series from quadral takes it with the very big players.

Equipped with the AURUM proven quadral ALTIMA® membrane and the pressure chamber reflex system in the bass, PLATINUM+ series has outstanding AURUM genes.

High wall thickness guarantees maximum impulse fidelity and lowest discoloration. And last but not least, the ring radiators with optimized waveguides provide a mature sound image.

PLATINUM⁺

High dynamics, powerful bass

The D'Appolito arrangement in the midtones of the PLATINUM⁺ **seven** and PLATINUM⁺ **nine** ensure maximum dynamics and low cut-off frequencies with gentle filters for an optimized phase response. The 2x 210mm quadral ALTIMA® woofers of the PLATINUM⁺ **nine** also provide an abyss, powerful bass.

Optimized surround

The PLATINUM⁺ **one** is the compact center speaker of the PLATINUM⁺ series and perfectly complements the PLATINUM⁺ **two** and +five in a home theatre operation. The new big brother PLATINUM⁺ **ten** is a real dynamic wonder and is the perfect partner for the two big tower speakers **+nine** and **+seven**.

Quality as Standard

As standard, all PLATINUM⁺ models feature stable adjustable spike feet with removable silicone protection for scratch-resistant floors. The equipment also includes chrome-plated high-end terminals with high-quality screw terminals and switches for high-frequency adjustment.
